The Philosophy of Wang Yang Ming

By **FREDERICK GOODRICH HENKE, Ph.D.**

Introduction by Professor **JAMES H. TUFTS, Univ. of Chicago**

The Philosophy of Wang Yang Ming is an important book for readers interested in philosophy and in Chinese thought. Here we have a prominent Chinese thinker represented in an English translation of his works, including a life of the author and an appreciation of his theories. This instance will introduce us to the mode of thought of Chinese philosophers, and will prove interesting not only to sinologists, but also to specialists in philosophy, and to historians of human thought, who naturally will compare the development of philosophical thought in the West with similar tendencies in the East.

Wang Yang Ming was an idealist of the monistic type. For his mind covered the entire gamut of existence; he thought that nothing existed independent and apart from mind. This seems to be very theoretical, but our author represents a most practical philosophy, for he believes that there can be no real knowledge without action. In many respects he reminds one of Kant. He believes that the individual has within himself the spring of knowledge, and should constantly carry into practice the things that his intuitive knowledge of good gives him opportunity to do.

Cloth, 512 pages.

Price, \$2.50.
